CONNECTING IDEAS!

What makes us **different.** <

Delta Inox. Connecting ideas. We are strong in project business, think holistically and have exactly the right solution for you and your needs!

Our team consists of specialists for fittings, flanges and tubes made of stainless steel and many years of experience in e-commerce.

Steel and digital - that's what we do best. We have known each other for years and know what it matters. Regardless of product or industry.

A digital course

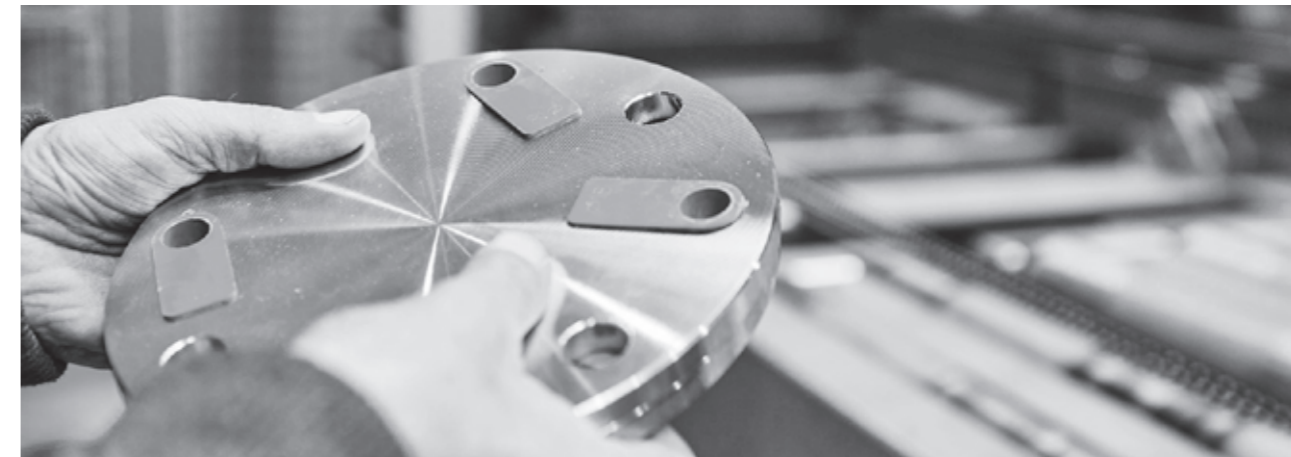

The e-commerce solutions we offer are somewhat special. We are in the unique situation of having an IT company within our group of companies that tailors all digital solutions specifically for us. Although our shop is still new, there are already years of development in it, which will, of course, go on and on!

From practical digital features to services from consignment stock to EDI connections, we are working on a wide variety of solutions that will make your life easier.

You can already order all our articles online around the clock, resubmit completed orders, manage certificates and share them at the click of a mouse, customize your product filters, upload orders as Excel spreadsheets, store your own article numbers and much more.

We are constantly working on new functions while being in direct contact with you. Take a look at what is already possible and visit us at:
